

**FORBES' 2004 INTERNATIONAL INVESTING GUIDE
PROBES GLOBAL MARKETS**

New York, NY (July 7, 2004)—While overseas funds and markets may seem daunting to many, *Forbes'* International Investing Guide breaks down strategies and offers helpful tips with related stories and “do-it-yourself” charts. *Forbes'* survey of international stocks includes comprehensive approaches for “investors who like to roll up their sleeves, passive investors, and a third position which combines elements of passive investing with a simple but effective tax dodge.” For more, visit www.forbes.com.

CASTING A WIDER NET (p. 138)— International investing isn't easy, but it's sure worth the trouble. Just ask Sir John Templeton's successors who continue to exercise his, “principle of maximum pessimism.”

IT'S A SMALL-CAP WORLD (p. 144)— T. Rowe Price's Justin Thomson delivers big returns to American investors by investing in foreign companies they've never heard of.

NEGLECTED TIGERS (p. 150)— China and India are booming, and Japan might finally be recovering. But, don't forget the rest of Asia.

STURM UND DRANG (p. 162)— Despite the current depressed mood in Germany, Norbert Walter, Deutsche Bank's chief economist, says the export-happy country will benefit from rising world trade.

THE INVESTMENT SAMBA (p. 166)— Ever-volatile Latin America is like the dance: three steps forward, two back. You have to pick your country, says Peter Gruber, who likes Brazil the best.

ALSO IN THIS ISSUE:

FEAR FACTOR (p. 52)— After spending billions of dollars on preventing future terrorist attacks, whether we're any safer is still an open question.

WHAT MAKES CISCO RUN (p. 66)— John Chambers has a new vision of what his company, and the world, can be. He wants to deliver the next Internet revolution.

THANKS, NOW MOVE OVER (p. 76)— China's fledgling automakers are happy to learn from the world's best right now. But, judging by what happened in mobile phones and motorcycles, companies like GM better watch out.
